

## ULTRAFOG – MARINE FIRE

### ENGINEERED FIRE SUPPRESSION SYSTEMS

*A full turnkey solution; from design and engineering to manufacturing, system certification, after-sales support, and warranty services.*

MarineFire's engineered fire suppression systems use **FK-5-1-12** (also known as NOVEC 1230) as the extinguishing agent and provide reliable solutions for large Yachts >24m up to 500GT, workboats, and marine vessels.

- **Fully customizable** with options such as different activation modes (manual, pneumatic, electric), delays, and sirens, these systems are housed in compact, solid cabinets for easy installation outside the engine room and fully integrable with the onboard fire alarm system.
- With the same principle we also manufacture fully customizable CO2 fire suppression systems for galley hoods.

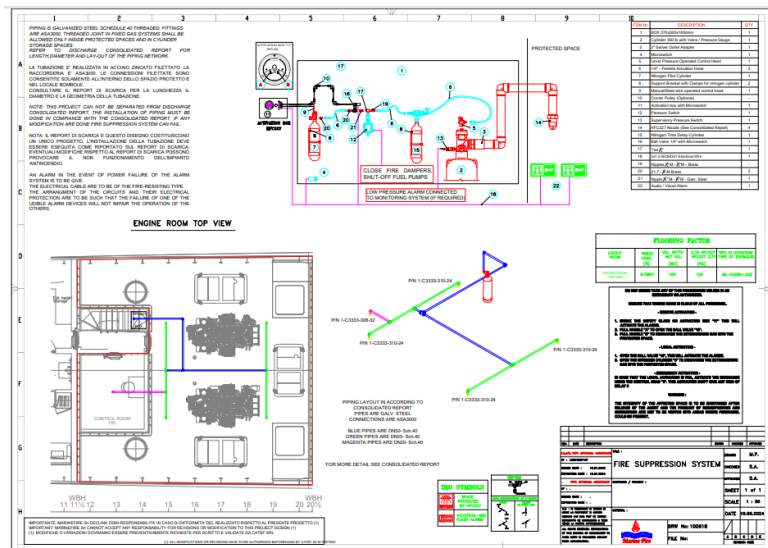

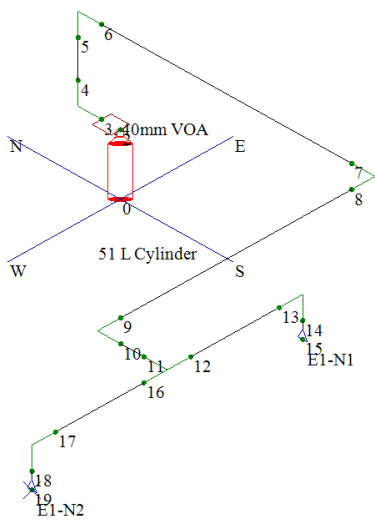

Marine Fire is a brand of

[www.ultrafog.com](http://www.ultrafog.com) [www.marine-fire.com](http://www.marine-fire.com)

- Additionally, we offer system design services tailored to the yacht's General Arrangement, ensuring **compliance with international regulations**, flag state requirements, and classification society standards.
- Our services include **precise hydraulic calculations** and system optimization to guarantee optimal performance and safety.

- Our systems are tested to IMO/SOLAS standards and hold multiple international certifications.
